National Association for Farmer Producer Organisations (NAFPO) and Agribusiness Market Ecosystem Alliance (AMEA) collaborate to organise the India FPO Dialogue in light of Antodaya Day to bring forward important stakeholders of the FPO ecosystem to discuss opportunities to collaborate. The FPO ecosystem in India is evolving rapidly, with new models, technologies, and support systems coming into play. The advent of digital platforms, advanced agriculture practices, and innovative financing mechanisms is re-shaping the landscape. FPOs now stand at a crossroads, requiring strategic benchmarking and alignment with market expectations and financial institutions to foster collaboration effectively.
